

Close the clinical documentation loop in 2023. Expert tips for hospitals.

An Incomplete Patient Story

Patient records require greater context and depth. But close to 60% of care records miss documentation.

A Friendly Nudge

AI or systems that are designed to provide automated prompts to physicians are used by most hospitals.

89%

Eight nine percent of hospital CFOs believe CDI improves case mix and reduces revenue leakage.

90%

Ninety percent of hospitals who outsource CDI efforts see a minimum of 1.5 million dollars increase in revenue.

#1

CDI programs remain a top priority for healthcare organizations.

Clinical Documentation Best Practices

Utilize SOAP notes to maintain documentation consistency.

Ensure E/M levels reflect the nature of the patient visit.

Document ROM (risk of mortality) and SOI (severity of illness) details.

Including all relevant details, such as medications and test results.

Provide complete data security of all clinical records.

Capture new developments and important findings in real-time.

Being aware of and adhering to legal and regulatory guidelines.

Benefits of a strong CDI program

Optimizes claims

An effective CDI program improves coding accuracy and reimbursement.

Breaks down silos

Improved communication through CDI programs reduces information silos.

Positive ratings

Clear documentation improves ratings from healthcare rating companies.

Healthcare organizations are under pressure to maintain pristine medical documentation. CDI programs remain the top priority of healthcare leaders in 2023. A lot hinges on the documentation and coding of healthcare records.
